AI ACADEMY & AI FILM STUDIO · GETTING STARTED

How We Start with RM250k

One grant + working-capital round stands up both engines and funds a ~6-month runway to first compounding revenue. Costs are front-loaded — acquire the first cohorts, build the courses, ship the tools, pilot the studio — before tuition, tool subscriptions, and film revenue turn.

RM250k TOTAL TO START

~6 mo RUNWAY TO TRACTION

≥500 INTRO BUYERS FUNDED

3 REVENUE STREAMS ON

USE OF FUNDS

Learner acquisition / marketing	**RM60k · 24%**
AI Film Studio pilot + talent	**RM50k · 20%**
Team & operations (6-mo runway)	**RM45k · 18%**
Course build & content	**RM40k · 16%**
Tools & infrastructure	**RM35k · 14%**
Contingency / working capital	**RM20k · 8%**

TOTAL CAPITAL TO START **RM250k**

THE PATH — 3 PHASES TO FIRST REVENUE

1 · Build MONTH 0–2 — ≈ RM75k

Build the 2-hr intro + Bootcamp + Certificate curriculum; stand up Cora AI Gateway + OneIP + LMS/CRM & payments; sign the first actors / KOLs for the studio.

✓ Platform live · courses ready · first talent signed

2 · Launch MONTH 2–4 — ≈ RM90k

Marketing engine on — weekly paid intro cohorts (RM299) with on-the-spot Bootcamp upgrades; first Cora tool subscriptions begin recurring.

✓ ≥100 intro buyers (Q3 pilot) · Bootcamp cohort 1 · MRR starts

3 · Compound MONTH 4–6 — ≈ RM85k

First Certificate cohort; AI Film Studio pilot ships 2–3 DFY productions; finished films become marketing that fills the next cohort — the flywheel turns.

✓ ≥500 intro (Q4) · first film delivered · ladder + MRR compounding

RM250K SWITCHES ON 3 REVENUE STREAMS

Course tuition ladder
RM299 intro → RM48k Mastery · intro ≈ self-funds its own CAC

Recurring tool subscriptions
Every student stays on Cora AI Gateway + OneIP → MRR that outlives the course

Film production (DFY)
Studio production fees + per-film funding + licensing, once the pilot proves out

Illustrative use of funds & sequencing · MYR · costs front-loaded; team on revenue-share to keep fixed cost low · figures adjustable in the financial model
