

Demand vs Curriculum Fit — does the partner content match search demand?

Top AI-learning & AI-business search clusters (2025–26, MY/SG/ID-weighted) mapped against the partner's A/B/C courses. Strong on the SEA commerce wave — but three high-demand clusters are uncovered.

● partial

● missing (high-demand)

Verdict rides the #1 SEA wave
Strong fit for MY / ID commerce-led growth — TikTok selling + make-money-online + AI-for-SME is the biggest regional demand pole, and the partner owns it (S3 + SME + OPC distribution).

MY · ID ✓
Commerce & TikTok wave — bullseye

SG ✗
Wants pro AI/data skills, not selling

- 3 gaps to fill**
- **AAA / AI agents / sell AI services** — highest-margin, fastest-rising demand; partner has none.
 - **GenAI / ChatGPT-for-work intro** — the volume tripwire that feeds S1 + funded courses.
 - **Singapore** — professional AI/data skills (SkillsFuture-claimable).

- Recommendation — add 2 tracks**
- **RM299 GenAI-for-work intro** — cheap, high-volume tripwire (partner's floor is ~RM12k).
 - **AI Automation / Agents track** — capture the best-margin monetization demand.
 - Reframe headline as **"AI to grow your business"**, not dropshipping — protects brand + funding eligibility.

DESIGN PRINCIPLE · LEARN ON OUR TOOL

Every course teaches students to work in **Cora AI Gateway as their always-on AI coach** (Chat · Cowork · Video Studio) — **C** adds **OneIP**. They learn AI **by using our platform** → keep using it after class → **recurring subscription revenue** (the flywheel, not one-off course fees).

Directional demand from Google Trends, course-marketplace enrollments, YouTube/Reddit/TikTok volume & SEA e-commerce/gov-program data (2025–26) · not paid keyword-tool exports · verify before external use
