The Stronger AI Gets, the More Personal IP Is Worth

Institutional forecasts (IDC · Stanford HAI · Goldman Sachs · WEF · McKinsey): the AI economy soars, jobs restructure, personal brand becomes the exit.

Metric · forecast	2027	2028	2029	2030
● Global AI economic value	\$3.2T	\$3.8T	\$4.4T	\$4.9T
● AI market CAGR	25%	27%	28%	30%
● Workforce cut (forecast)	5–10%	10–15%	15–20%	20–30%
● Automatable jobs	20%	25%	30%	35%+
● Creator economy	\$400B	\$440B	\$470B	\$500B+
● AI-skill demand	High	Higher	Standard	Must-have

Professionals pivot to the Creator Economy: doctors · lawyers · accountants · teachers · realtors · agents all build personal IP — OneIP's users.

Sources: IDC / Stanford AI Index / Goldman Sachs / WEF / McKinsey (2024–2026). "Workforce cut" is a blended industry-forecast range, not official data.

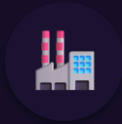

AI Is Rewriting Every Industry

AI is evolving faster than anyone imagined. As it replaces real-world work, value migrates to what cannot be copied.

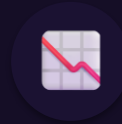

Beyond Expectation

AI capability iterates monthly — faster than any industrial revolution.

Adopted Everywhere

Support, design, copy, coding, sales — roles taken over one by one.

Jobs Replaced

More people lose their jobs to AI; skill moats evaporate fast.

Value Migrates

Copyable labor trends to zero cost; scarcity becomes the only premium.

Only People & Fans Can't Be Replaced

● Personal IP / Creators

AI can assist, but can't BE that person. Personality, story, trust — inherently unique.

● Fan Data / Fan Emotion

Real attention and emotion can't be generated. AI amplifies — it doesn't replace.

**One IP, one brand —
fan emotion creates value.**

One of a Kind

Turn that uniqueness into a priceable, tradable, monetizable asset.

OneIP: A Dual-Engine IP Economy

oneIP.ai

Create IP · Supply

Use AI to turn any creator / KOL / brand into distributable, licensable digital IP assets at scale.

- AI avatar / IP persona
- Content at scale (text / video)
- Licensable IP asset packs

oneIP.io

Trade IP · Liquidity

A Solana launch & trading terminal (pump.fun-style) that prices, circulates and monetizes IP on-chain.

- 1-click IP / KOL token launch
- pump.fun-style trading terminal
- Fees + liquidity monetization

Dual-Engine Model: Create IP × Trade IP

oneIP.ai supplies IP, oneIP.io prices & monetizes it — one real-asset-backed IP economy.

oneIP.ai

Create IP · Supply

- **Product**

AI avatar · content at scale · IP packs

- **Customers**

KOLs · talent · brands · MCNs

- **Revenue**

AI subs · licensing · custom IP

- **Moat**

IP-library flywheel · consistency models

oneIP.io

Trade IP · Liquidity

- **Product**

1-click launch · pump.fun-style terminal

- **Users**

Creators issue · fans/retail trade

- **Revenue**

Trading fees (core) · launch · subs

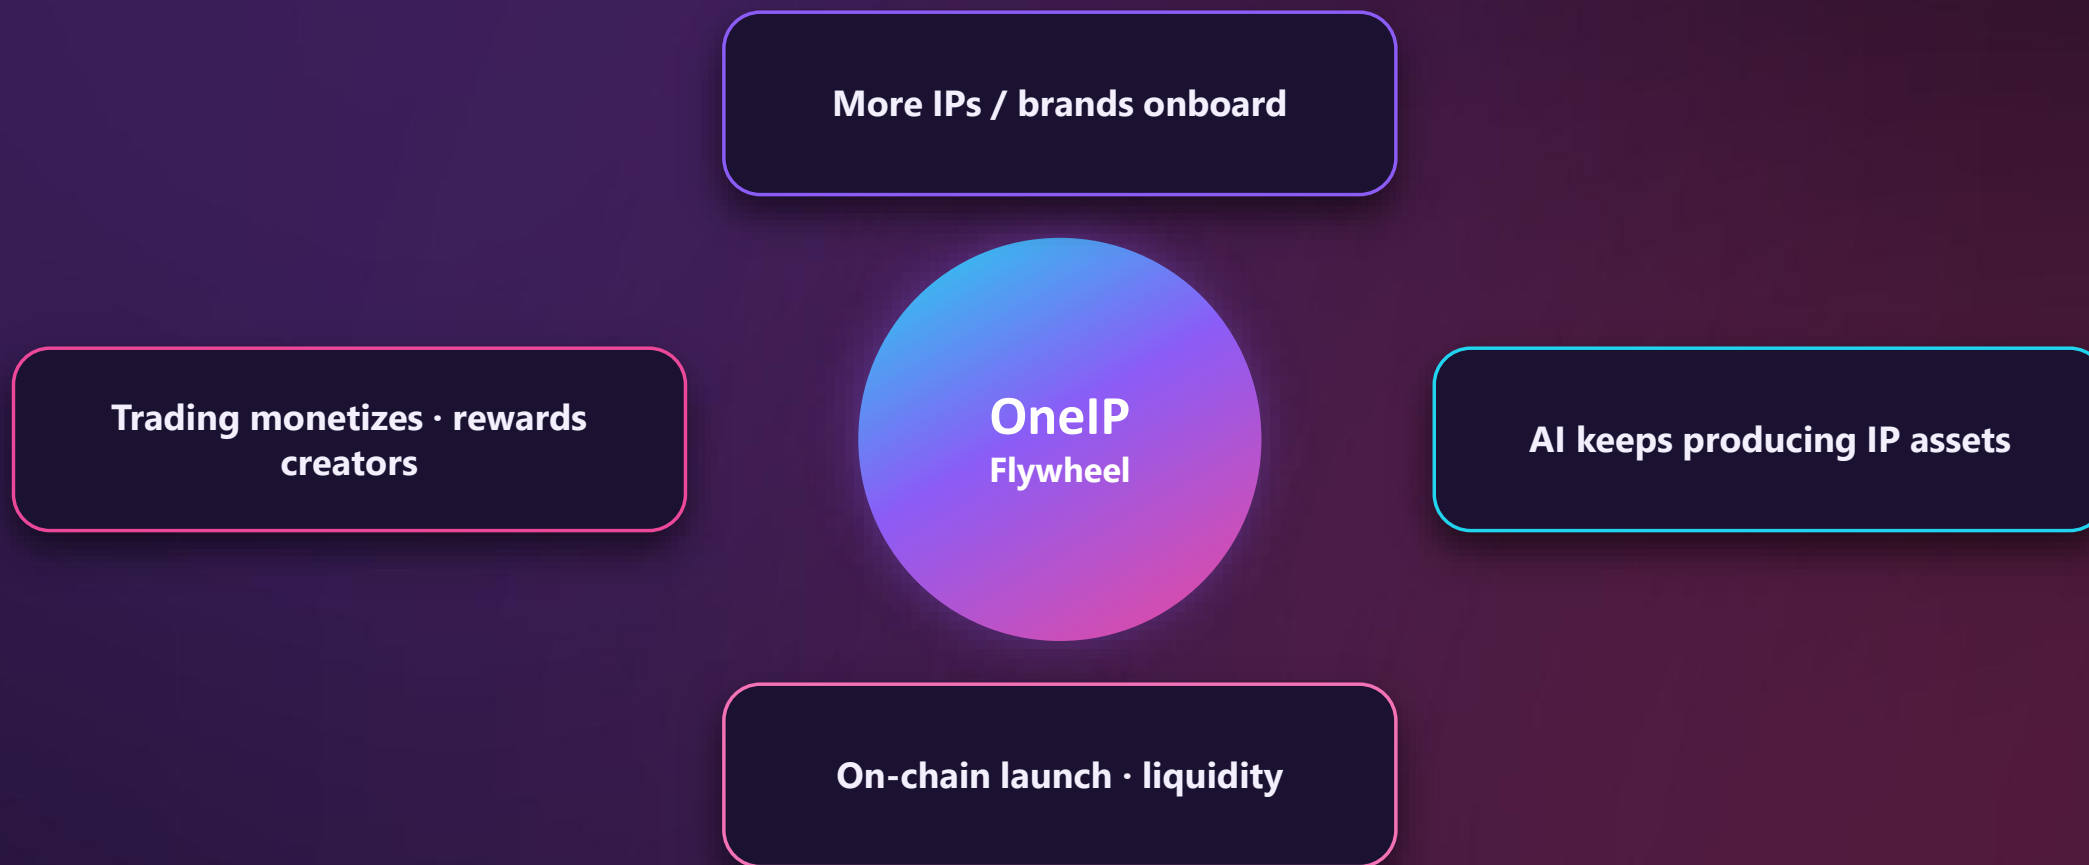

- **Moat**

Volume→liquidity network · stickiness

Iron rule: No top-up swaps · no guaranteed returns · external cash-out only — anti-Ponzi.

AI Supply × On-chain Liquidity = Self-growing Flywheel

Others only launch tokens (speculative, prone to zero). We secure real supply via AI and liquidity via chain.

Value for Everyone: Every Side Wins on OneIP

Brand, supplier, everyday creator, KOL or IP — each side has its own way to earn on OneIP.

Why partner with us

What you earn on OneIP

How OneIP helps

Brands & Suppliers

Commerce side

- Reach KOLs & loyal fans
- Fans are buyers — higher conversion
- One platform, countless IPs

- Sell into fan communities
- IP collab / licensing share
- Upside from early launches

- Precise IP + fan-data match
- On-chain auto split, transparent
- Anti-Ponzi, compliant venue

Creators · KOLs · IP

Creator side

- Influence becomes an asset
- Zero-barrier token launch
- AI-assisted content engine

- Launch raise + ongoing royalties
- Fees · tips · memberships
- Brand deals / sales share

- 1-click launch + terminal
- AI-built IP: avatar & content
- Social tools + traffic & brands

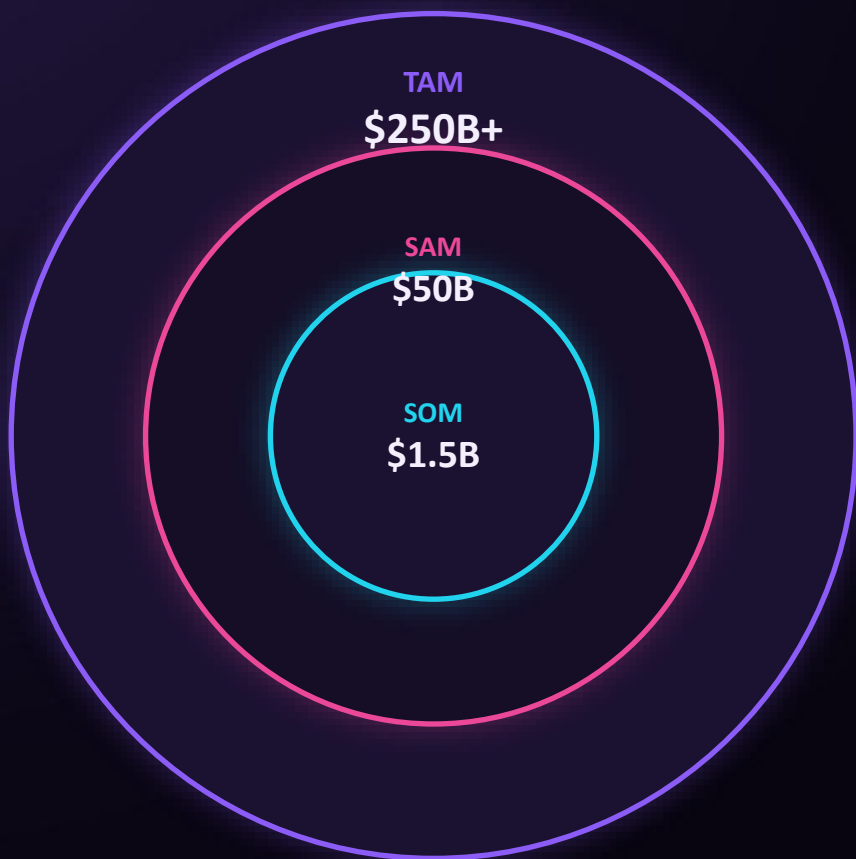

Why OneIP: One Platform Fixes Everyone's Gaps

Launch, trading, social, brands — each player has strengths and gaps. OneIP unifies them, safely.

Player	Core function	Trait	Safety	Pain point	Edge
 pump.fun	1-click meme launch	Pure on-chain · open	No vetting · rug-prone	Speculative · no retention	Fast cold-start
 Social platforms	Content & connection	Centralized reach	Platform-compliant	Hard to monetize · high cut	Large fan base
 Brands / IP	Licensing / collab	Centralized licensing	Mature compliance	Slow · no fan stake	High trust
 OneIP	Launch+trade+social+AI	IP-ization · co-creation	Anti-Ponzi · ext. cash-out	Fixes every gap	Real-value loop

A Trillion-Dollar IP Economy, Moving On-chain

The creator economy keeps surging; making fan emotion priceable & tradable is its biggest unmet gap.

● **TAM · Global creator economy**
Annual global creator / influencer economy

● **SAM · Tokenizable IP market**
Influencer / KOL / brand IP fit to tokenize

● **SOM · Obtainable in 3 yrs**
OneIP's reachable launch+trade+social share

Drivers: ~20% creator-economy CAGR · surging fan-token demand · short-video KOL supply · fans pay for belonging

THE ASK

Raising US\$2M · for 20% Equity

US\$10M post-money; runway of 18 months to prove the dual-engine loop and reach first-stage scale.

20%	Operations Team, multi-country offices, compliance & ops	US\$400K
20%	Product oneIP.ai models + oneIP.io terminal	US\$400K
30%	Marketing User growth, brand & community	US\$600K
20%	KOL · brand · supplier KOL signing, brand & supply deals	US\$400K
10%	Reserve Buffer for contingencies & opportunities	US\$200K

THE VISION

Give every unique IP its own on-chain economy.

AI replaced everything copyable;
OneIP turns the uncopyable — people & fan emotion — into real assets.
