

The Course Ladder & What We Measure

A paid intro course turns strangers into buyers, then ascends them up a ladder of longer programs — each one bundling our AI Tools so course revenue becomes recurring revenue. Two scorecards keep the two businesses honest.

Currency MYR (RM) Entry 2-hr intro · RM299 (first 20 seats) Tools Cora AI Gateway · OneIP Status Draft for review

1 The Product

THE VALUE LADDER

Five rungs, one on-ramp

The intro is a tripwire — priced to feel like a steal, built to pre-sell the ladder. Each rung climbs in depth, price, and commitment, and every rung bundles the OPC tools: Cora AI Gateway + OneIP. **Std** = professional (S2) price · **Grad** = graduate (S1) scholarship — income-share / financing. Programs of 1 year and up show the monthly plan.

The toolchain taught here

Cora AI Gateway — Chat · Cowork · **Video Studio** (short reels & daily AI work) · **OneIP** — turn output into income. Produced films run on a separate tool, **Cora AI Film Studio** (see the rollout plan) — it appears here only as practicum in the 2- and 4-year programs.

ASCENSION BY SEGMENT

Not everyone climbs to the top

Run three ascension tracks off the same intro — each pointing at the ceiling that segment actually buys.

SEGMENT	NATURAL ENTRY	LIKELY CEILING	WHY
S1 — Graduates	Discover → Bootcamp	Diploma / Mastery · 2–4 yr	Career / degree alternative; financing + income-share unlock the long programs
S2 — Mid-life 35–55	Discover → Bootcamp	Certificate · 1 yr	Want fast work/business results; premium & offline-friendly, less appetite for 4 yrs
S3 — Influencers / KOL	Discover → Bootcamp (specialized)	Certificate + rev-share	Value monetization & AI film over long study; feed into OneIP + Studio deals

LADDER ECONOMICS

Target conversion at each step

The intro funds acquisition; the ladder + tools fund the business. Measure every step against these targets.

5–10%Qualified lead → **Discover****20–30%**Discover → **Bootcamp****15–25%**Bootcamp → **Certificate****30–40%**Certificate → **Diploma****30–40%**Diploma → **Mastery**

PERFORMANCE METRICS

Two scorecards, one bridge

The Academy and the Tools are two different businesses. Keep their scorecards separate — then watch the bridge that connects them, because that's where the strategy lives or dies.

★ NORTH-STAR METRIC

Graduates monetizing — students earning income with AI (e.g. ≥ RM500/mo)

It proves the Academy (marketing), drives Tools retention (they keep using Cora/OneIP to earn), and justifies premium pricing — all at once. Financial twin: **blended MRR** (amortized course revenue + tool subscriptions).

SCORECARD A

AI Academy

Education economics

METRIC	TARGET
Intro signups (paid)	Q3 ≥100 · Q4 ≥500
CAC per intro buyer	≤ RM120
Lead → intro conv.	5–10%
Ladder ascension rate	per targets
Completion rate	≥ 70%
NPS	≥ 40
Outcome rate (job/OPC/first RM)	≥ 30% @ 90d
Refund rate	≤ 5%
Course LTV : CAC	≥ 3 : 1

SCORECARD B

AI Tools

Cora AI Gateway + OneIP · recurring economics

METRIC	TARGET
Attach rate (activate tool acct)	≥ 90%
Activation ("aha") @30d	≥ 60%
Post-bundle paid conv.	≥ 40%
Tool MRR / ARR	grow MoM
Monthly churn	≤ 5%
Net revenue retention	≥ 100%
Engagement (WAU/MAU, credits)	rising
OneIP GMV & creators earning	grow MoM
Gross margin	~70% B2C

X1

Student → paying tool subscriber

The flywheel's core conversion. If this breaks, we're just a course seller.

X2

Blended LTV

Course ladder LTV + tool subscription LTV per student.

X3

Graduate-earning rate

The proof metric that lowers CAC and raises pricing power.

2 | How the Team Executes

ROLES

Who owns what

Assign real names — one person may hold several to start.

ROLE	OWNS	FIRST JOB
Program lead	Curriculum, instructors, delivery quality	Build the 2-hr intro + Bootcamp outline
Growth / marketing	Funnel, ads, KOL partners, enrolment	Fill the first intro cohort
Sales / ascension	Live intro pitch, ladder conversions, financing	Own the intro → Bootcamp close
Tools / product	Cora AI Gateway + OneIP provisioning, learner mode, dashboards	Auto-provision tool access on enrolment
Ops / finance	Payments, LMS, CRM, cohorts, KPI dashboard	Stand up payment + LMS + scorecards

BUILD SEQUENCE

Do these in order

- 1 Ship Rung 1 first. The 2-hr intro is the engine's ignition — build and sell it before anything downstream, and script it to end with the Bootcamp offer.

2 **Lay the money + delivery rails:** payment with installments, LMS/webinar, CRM, and **automated tool provisioning** (enrol → Cora AI Gateway / OneIP account + bundled credits). Attach rate depends on this.

3 **Build the Bootcamp (Rung 2)** while intro cohorts run — that's where revenue and tool-attach concentrate.

4 **Outline rungs 3-5** and open a **waitlist / deposit** before building them fully. Let demand fund the build.

The intro-course launch play (Rung 1)

The content *is* a demo of the ladder — teach, then sell the next rung live:

1. Teach the OPC concept → demo Cora AI Gateway live (Chat / Cowork / Video Studio) → show an OneIP monetization example.
2. Present the 3 monetization paths.
3. Make the Bootcamp offer with an on-the-spot **upgrade credit** (the RM299 counts toward it).
4. Drive the close with hard scarcity: **RM999 list, RM299 for the first 20 seats only** — show an "X of 20 left" counter; later cohorts get a smaller discount, never back to RM299.
5. Run it weekly as a repeatable cohort — each intro is both revenue and top-of-funnel.

OPERATING RHYTHM

When we look at the numbers

WEEKLY

Growth stand-up

Signups, CAC, conversion; tool engagement.

PER COHORT

Cohort retro

Ascension, completion, attach, activation.

MONTHLY

Business review

Full Scorecard A + B + Bridge; MRR, churn, refunds.

QUARTERLY

LTV:CAC, NRR, outcome rate, North Star; reprice.

TIMELINE

Mapped to the Q3-Q4 rollout

WHEN	MILESTONE
Now → Aug	Build + launch Rung 1 intro (early bird); stand up payment / LMS / provisioning + KPI dashboard
Sep	First paid intro cohorts + Bootcamp pilot; measure Discover → Bootcamp step
Oct-Dec	Scale intro cadence; Bootcamp at volume; Certificate cohort #1; waitlists for Diploma / Mastery
Dec	Review Scorecards A / B / Bridge; set 2027 ladder pricing from real conversion data

● Cora AI Gateway (Academy) ● OneIP (AI Tools)

Prices for rungs 2-5 are proposed anchors — adjust to market. Living document; update targets with real numbers after the first cohorts.
