

Competitive Analysis — AI Courses across MY · SG · ID

The market splits into cheap-but-shallow subsidised workshops and slow, expensive degrees/immersives — a wide "missing middle." No incumbent bundles usable AI tools into an income-share model, and none offers a creator/AI-film monetization path.

WHERE ONEIP WINS

We own the missing middle + the monetization gap

Same ladder across all three markets — not subsidy-dependent.
Intro RM299 → Bootcamp RM3,999 → Cert RM18k → Diploma/Mastery RM32–48k, priced to undercut degrees while going far deeper than workshops.

Fills the missing middle

Affordable + deep + outcome-linked where rivals are either shallow workshops or RM50k+ immersives/degrees.

Income-share / earn-as-you-learn

Graduate scholarship pricing + financing; HRD Corp / Prakerja / instalments — price is never the barrier.

Tools bundled → recurring

Every rung ships Cora AI Gateway + OneIP credits. No competitor turns a course into recurring tool revenue.

A monetization path, not a cert

OneIP storefront + AI Film Studio (DFY/DIY) — students earn income, the one thing no incumbent offers.
